

applyActionAddressCells

applyActionSizeCells

fdtInternalReadProperty

```
graph LR; A[applyActionAddressCells] --> C[fdtInternalReadProperty]; B[applyActionSizeCells] --> C;
```

The diagram illustrates a flow where two separate actions, 'applyActionAddressCells' and 'applyActionSizeCells', both point to a single target, 'fdtInternalReadProperty'. The target box is shaded gray, while the source boxes are white. Blue arrows indicate the direction of the flow from left to right.
